

Student Developers Club (SDC)

Vision

- To become a premier institute which produces industry leaders in the software development or system development.
- To develop a community of students who are passionate about technology, innovation, and entrepreneurship across various fields.

Mission

- To provide a platform for students to develop technical, professional, and soft skills.
- To provide different training to students through industry experts or through peer mentoring with respect to current industry requirements.
- To encourage innovation, research, and entrepreneurship among students.

Student Developers Club (SDC)

Activities Planned:

- ❖ A peer mentoring session on the effective learning of different programming languages. (By final year students/some KIT faculty) (tentatively in mid of October)
- ❖ A hands-on session on ‘Docker and Kubernetes’, to make students understand, how containerized development works. (Session can be conducted by some industry expert in the above field)(Tentatively in mid of November)
- ❖ Few more activities will be planned in even semester of academic year 2024-25 by considering industry relevance and availability of the expert in the related field.

Faculty Coordinator : Dr. Ashish Patil
